

**FUNCTIONAL TWIN TAILS SETS THE MARS A STEP AHEAD OF THE LOOK-A-LIKE LOW WINGERS.**

*One piece unitized main gear gives smoother shock free takeoffs and landings and is almost impossible to tear out - combined with spruce spars this gear setup makes the wing almost undestructible*

**DESIGNED WITH THE BUILDER IN MIND THIS PRECISION KIT INCLUDES THE FOLLOWING:**

- Complete full size drawings - rolled not folded including complete detailed radio installation*
- One piece cast aluminum motor mount*
- Pinned hinges - not strip nylon*
- All links including threaded rod*
- Complete adjustable aileron linkage*
- Complete nose gear assembly*
- All Control horns*
- Self tapping engine mounting bolts*
- All nuts, bolts and washers*
- Vacuum formed canopy and cowls*
- All parts are pre-shaped*
- All critical parts are sawed - not diecut*
- Only the finest materials used throughout*
- Span 52" Power .29 to .49*
- Weight 3 1/2 lbs (less radio)*

*The Mars is available direct or from Sig Manufacturing Company*

*A combination of looks and flying performance never before in an R/C pattern ship*

*Aerodynamically clean design with functional twin tails and elliptical wing tips makes the Mars exceptionally stable in turbulence yet highly maneuverable, so stable in fact that the Mars can be flown by anyone who can fly unassisted*
